

# PROJECT TESTING PHASE

## 7.1 Activity 1 – Create New Incident

A new Incident was created and the **Impact** was set to **1 – High** while **Assigned To** was left empty. When Submit was selected, the system prevented the Incident from being saved and displayed the validation message.

### Expected Result:

The Incident should not be saved when Assigned To is empty for a High Impact Incident. The UI Policy and Urgency behavior should also work correctly.

### Actual Result:

The validation worked successfully and the Incident was not submitted without the required information.

### Screenshot:

The screenshot displays the ServiceNow 'Incident - Create' form. The browser address bar shows the URL: dev423241.service-now.com/now/nav/ui/classic/params/target/incident.do%3Fsys\_id%3D-1%26sysparm\_query%3Dactive%3Dtrue%26sysparm\_s... The form title is 'Incident - Create INC0010007'. The left sidebar shows the 'Incident' menu with 'Create New' selected. The main form area contains the following fields and values:

- Number: INC0010007
- Channel: -- None --
- State: New
- Impact: 1 - High
- Urgency: 1 - High
- Priority: 1 - Critical
- \* Caller: Abel Tuter
- Category: Inquiry / Help
- Subcategory: -- None --
- Service:
- Service offering:
- Configuration item:
- \* Assignment group: CAB Approval
- Assigned to:
- \* Short description: testing ui policy
- Description:

Validation messages are displayed at the top of the form:

- Urgency set to High for High impact incident.
- The following mandatory fields are not filled in: Assignment group
- Assigned to is mandatory for High impact incidents.

The 'Submit' button is highlighted in green, and the 'Resolve' button is disabled. The bottom of the form shows a 'Related Search' section with the query 'testing ui policy' and a dropdown for 'Knowledge & Catalog (All)'.

## 7.2 Activity 2 – Successful Incident Submission

The **Assigned To** field was filled and the Incident was submitted again. The Incident was saved successfully. The automatic Urgency setting and other field restrictions were also verified.

### Expected Result:

The Incident should be saved successfully after providing the required information.

### Actual Result:

The Incident was saved successfully and the configured rules worked as expected.

### Screenshot:

The screenshot shows the ServiceNow Incident form for incident INC0010007. The form is titled "Incident - INC0010007" and includes a search bar and navigation tabs (Discuss, Follow, Update, Resolve, Delete, Responses). The form fields are organized into two columns. The left column contains fields for Number (INC0010007), Caller (Abel Tutor), Category (Inquiry / Help), Subcategory (None), Service, Service offering, Configuration item, and Short description (testing ui policy). The right column contains fields for Channel (None), State (In Progress), Impact (1 - High), Urgency (1 - High), Priority (1 - Critical), Assignment group (CAB Approval), and Assigned to (Bernard Laboy). Below the form fields, there is a "Related Search Results" section and a "Notes" section with tabs for "Related Records" and "Resolution Information". The "Notes" section includes a "Watch list" and a "Work notes list" with a "Post" button.

### 7.3 Activity 3 – Reverse Condition Test

An existing Incident **INC0010003** was opened with Impact set to **High**. The Impact was changed from **High** to **Medium**.

### Expected Result:

When Impact is changed from High to another value, **Assigned To should no longer be mandatory** and **Urgency should become editable**. The Incident should be saved successfully.

### Actual Result:

The reverse condition worked successfully. Assigned To was no longer mandatory, Urgency became editable, and the Incident was saved.

## Screenshot:

The screenshot shows the ServiceNow interface for an incident record. The left sidebar contains navigation links for Self-Service, Business Applications, Dashboards, Service Catalog, Employee Center, Knowledge, Visual Task Boards, Incidents, Watched Incidents, My Requests, Requested Items, Watched Requested Items, My Connected Apps, My Profile, My Tagged Documents, My Tags, My Knowledge Articles, Take Survey, and My Approvals. The main form displays the incident details for INC0010003. The form fields are organized into two columns. The left column includes fields for Number (INC0010003), Caller (Abel Tuter), Category (Inquiry / Help), Subcategory (-- None --), Service, Service offering, Configuration item, Short description (hil), and Description. The right column includes fields for Channel (-- None --), State (New), Impact (2 - Medium), Urgency (1 - High), Priority (2 - High), Assignment group (Software), and Assigned to. Below the form fields, there is a 'Related Search Results' section. At the bottom, there are tabs for Notes, Related Records, and Resolution Information. The Notes tab is active, showing a 'Watch list' and a 'Work notes list'. The 'Work notes' field is visible, and there is a 'Post' button. A checkbox for 'Comments (Customer visible)' is also present.

### 7.4 Activity 4 – State Change Through List Editing

The Incident list was opened through **Incident → All**. The **State** field was double-clicked to perform a direct list edit.

#### Expected Result:

Direct State changes through list editing should be blocked and an alert message should be displayed.

#### Actual Result:

The alert message was displayed and the State value remained unchanged.

## Screenshot:

## 7.5 Activity 5 – State Change Through Incident Form

The same Incident was opened from the Incident form. The **State** value was changed and the record was updated.

### Expected Result:

State changes made through the Incident form should be saved successfully.

### Actual Result:

The State change was saved successfully through the Incident form, while the other configured rules continued to work.

## 7.6 Testing Summary

The project was tested using different Incident scenarios to verify the configured **UI Policy**, **UI Policy Action**, **onChange Client Script**, **onSubmit Client Script**, and **onCellEdit Client Script**. The testing confirmed that the configured field behavior, validation, automatic value update, and State editing restriction worked as intended.
